EPICOR

Forecast Pro for Epicor

Low-cost, simple, and accurate demand forecasting software. Implement & onboard quickly for fast, tangible results. With improved forecast accuracy you'll see immediate cost savings, improved inventory management, better customer service, and higher ROI.

Forecast Pro for Epicor starts at just \$250 per month.

- Trusted by over 100 Epicor installations
- Automatic AI-driven forecasting, including machine learning methodology
- Customized hierarchies & multiple units of measure
- Seamless forecast adjustment & collaboration
- Forecast accuracy tracking & exception reporting

Generate Accurate Forecasts Automatically

Forecast Pro for Epicor overcomes the pitfalls of a “one-size-fits-all” forecasting approach by automatically analyzing the history of each item and choosing the best forecasting model on an item-by-item basis.

Adjust Forecasts with Business Expertise

Forecast Pro for Epicor lets you adjust your forecasts on a graph or in a spreadsheet-like display, allowing you to easily compare patterns in your data and make reconciled adjustments at any level of your product hierarchy. Forecast adjustments and overrides are maintained from one forecast cycle to the next, eliminating the need to re-key them each forecast period.

Monitor Forecast Performance

Forecast Pro for Epicor maintains an archive of your forecasts—both statistical and adjusted—so that you can compare forecasts vs. actuals. Forecast Pro for Epicor’s “Waterfall” report allows you to easily monitor forecast accuracy at any desired lead time.

Use a Wide Range of Methods & Specialized Models

Forecast Pro for Epicor includes Machine Learning models, Exponential Smoothing, Box-Jenkins (ARIMA), Event Models, and many other statistical methods—the system will automatically choose the best fit for each item.

Work with Multiple Hierarchies

With Forecast Pro for Epicor’s powerful “shuffling” capability, you can rearrange your hierarchy on-the-fly.

Manage by Exception

Forecast Pro for Epicor’s built-in exception reporting allows you to zero in on areas that need your attention.

Maintain Your Forecasts

“Forecast Projects” allow you to easily update your forecasts from one forecast cycle to the next and maintain a record of all your forecasting sessions.

S&OP/IBP

Compare multiple forecasts and collaborate to establish a consensus forecast on an ongoing basis.

Epicor Integration

Forecast Pro for Epicor integrates directly with Kinetic, iScala, and Vantage/Vista statistics & is compatible with Prophet 21 and Eclipse.
